Summary

Aspiring Software Development Engineer with strong programming skills in C, C++, Python, and JavaScript, and a solid understanding of data structures and algorithms. Experienced in building user-friendly web applications and implementing interactive features. Passionate about solving complex problems, writing efficient code, and contributing to scalable product development.

Skills

Programming: C, C++, Python, JavaScript, TypeScript

Frontend: React.js, HTML, CSS, Tailwind CSS, Framer Motion

Backend: Node.js, FastAPI, REST APIs

Database: Supabase, MongoDB, MySQL

AI/ML: RAG, FAISS, NLP, Scikit-learn

AI Tools: ChatGPT, Gemini, Claude, GitHub Copilot, Prompt Engineering, Hostinger horizon

Tools: Git, GitHub, Vercel, VS Code,, Figma, Antigravity

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks

Soft Skills: Communication, Team Collaboration

Projects

New Maa Enterprises - Digital Business Platform | React.js, TypeScript, Tailwind CSS, Supabase, Vercel, GitHub

- Developed a full-stack business website with retailer authentication and admin dashboard.
- Implemented role-based access control, session management, and database integration using Supabase.
- Built responsive mobile-first UI and content management features for products, offers, and business information.
- Configured GitHub-based development workflow and automated deployment on Vercel.
- Performed testing, debugging, security audits, and production optimization.

Personal Portfolio Website | React.js, Tailwind CSS, Framer Motion, Vite, GitHub, Vercel

- Designed and developed a modern responsive developer portfolio website.
- Implemented futuristic UI with animations, glassmorphism effects, and mobile-first design.
- Showcased projects, skills, experience, certifications, and contact information.
- Configured GitHub version control and automated deployment using Vercel.

EduMind (Ongoing) | *Python, FastAPI, FAISS, NLP, Scikit-learn, HTML, CSS, JavaScript*

- Developing a full-stack AI-powered learning platform using FastAPI and RAG architecture.
- Building a semester-aware academic chatbot with FAISS vector search and sentence-transformer embeddings.
- Implementing NLP-based topic classification and personalized recommendation features using TF-IDF, SVM, and Logistic Regression.
- Designing a recommendation engine for PYQs, revision materials, and adaptive practice questions.
- Integrating enrollment-based authentication and optimizing performance using lightweight ML models.

Awards & Certifications

- Qualified **Smart India Hackathon**.
- 100 Days of Code:The Complete Python Pro Bootcamp - Udemy.
- 100 Days of Code:The Complete Web Development Bootcamp - Udemy.

Education

Madan Mohan Malaviya University of Technology, Gorakhpur, Uttar Pradesh

Bachelor of Technology in Computer Science and Engineering(6th semester)

2023-2027

CGPA: 6.7

Holi Mission High School, Samastipur, Bihar

Senior Secondary(Class 12th)

2021-2022

Percentage 70%
